

Python Developer Job Description

Role Overview

We are seeking a talented Python Developer to join our engineering team. You will be responsible for building scalable backend components, designing data pipelines, and integrating third-party APIs. You will collaborate closely with frontend developers and data teams to deliver high-performance, secure software applications that drive our business goals.

Key Responsibilities

- **Software Development:** Write scalable, reusable, and maintainable code using Python and its frameworks (e.g., Django, Flask, or FastAPI).
- **Backend Integration:** Develop server-side logic and integrate frontend elements built by other team members.
- **Data Management:** Work alongside databases (PostgreSQL, MySQL, MongoDB) using Object-Relational Mapping (ORM) and build data pipelines.
- **Testing & Debugging:** Write unit tests and troubleshoot applications to ensure optimal performance, security, and stability.
- **System Optimization:** Refactor and optimize existing codebase for better scalability, speed, and responsiveness. [1]
- **Collaboration:** Partner with product managers, designers, and fellow engineers to assess feature requests and deliver technical solutions. [1]

Required Skills & Qualifications

- **Experience:** 3–5 years of professional software development experience primarily focused on Python.
- **Frameworks:** Hands-on experience with web frameworks like Django, Flask, or FastAPI.
- **Databases:** Strong knowledge of SQL and NoSQL database systems.
- **Web Fundamentals:** Basic understanding of frontend technologies (HTML5, CSS3, JavaScript).
- **Tools:** Proficiency with Git, Docker, and CI/CD pipelines.
- **Education:** Bachelor's degree in Computer Science, Software Engineering, or a related field (or equivalent practical experience).

Preferred Qualifications

- **Cloud Platforms:** Familiarity with AWS (EC2, Lambda, S3), Azure, or GCP.
 - **Data & AI:** Exposure to Data Science libraries (Pandas, NumPy) or basic Generative AI/LLM integrations.
 - **Problem Solving:** Excellent analytical skills with a strong ability to solve complex technical challenges.
-
